EQUIPMENT SYSTEMS & PROCESSORS FOR
Particle Size Reduction, Milling, Crushing, Sifting,
Classifying, Mixing, Pelleting, Agglomeration,
Extruding, Bulk Material Handling, Drying,
Cooling, Conveying & Packaging

We have a second-hand hammer mill as shown here available. This is a Pratter Sterling model G8H series which was made by Simon under licence. The unit has been overhauled complete with new bearings, hammers, pins, collars and spacers and is fitted with a 50 kW, 2 pole motor. The capacity when fitted with a Ø4mm hole screen is around 9.5 MTPH depending on the material being milled. The screen aperture may be fitted to suit the application.

The price is NZ\$ 9,800.00 ex-works Auckland. There is a stand also included. This mill generally would be installed above a conveyor preferably with a filter collector fitted for optimum efficiency and we can provide details where required.
