Cooling, Conveying & Packaging

Wood Pelleting Line Equipment Items for Sale

Also suited to straw, Lucerne and biomass pelleting applications

The attached pelleting equipment items forming a complete processing line are available including:

1. Rotary screener
2. Pellet press supply bucket elevator
3. Pellet press model MUZL610M complete with feeder, preconditioner, and automatic greasing
4. Cooler supply bucket elevator
5. Pellet cooler
6. Pellet screener
7. Finished pellet bucket elevator
8. Bag packer
9. Motor control center

All equipment is in excellent condition and has operated for low hours only to produce wood pellets for operating an in-house dryer burner unit.

The capacity for the pellet press when pelleting sawdust at 10-11% moisture content is up to 1.6 MTPH of 6mm diameter pellets. While the capacity of the associated handling items is up to 5 MTPH. This pelleting line is suitable for pelleting alternative types of materials including animal feedstuffs, straw, Lucerne, waste products, etc. The capacity when pelleting high fiber materials such as straw or Lucerne will be at around 4 – 4.5 MTPH.

Bins, hopper, support stand and transitions to make up a complete installation are also available where required. For further information, please contact Grain Tech.
